### How to Practice?

It is usually performed 1 to 2 weeks apart .If your problem is on on your face, your treatment will be once a week.If you have skin problem on your body ,your treatment will be in every two weeks apart.

The exact number of treatments will vary depending on current skin condition and age.

Whatever the problem, firstly a preapplication treatment is needed to find out how many sessions are necessary for ice therapy treatment. Secondly one or two weeks later, according to result we can tell you all details about treatment.

Once it is complete,the treated area will heal quickly and new layes of healthy skin will form.

The results of İce Therapy are permanent .

Treatment deals with collagen building and oxygenation within the skin.

Regulates collagen and elastin formation. İn fact you will notice your skin continue to improve up to 1 to 6 months after a series of treatments.
